Accessories

Check that the following parts are attached in addition to the main unit:

- ① Operating instructions1
- ② Service station list.....1
- ③ Pin-plug cable (Cable length: Approx. 0.6 m).....1
- ④ System cable (Cable length: Approx. 0.5 m)1

Before using

Pay attention to the following before using this unit:

• Moving the unit.

To prevent short-circuits or damaged wires in the connection cables, always unplug the power supply cord and disconnect the connection cables between all other audio components when moving the unit.

• Cautions on using mobile phones.

Using a mobile phone near this unit may result in noise. If so, move the mobile phone away from this unit when it is in use.

• Condensation (dew).

Water droplets may condense on internal operation parts if the set is brought into a heated room from the cold outdoors or when the room is heated rapidly. If this happens, the set may not operate properly.

• Should condensation occur.

The condensation will evaporate in one hour or less, at which time the system will function normally.

• Before turning the power operation switch on.

Check once again that all connections are correct and that there are not problems with the connection cables. Always set the power operation switch to the standby position before connecting and disconnecting connection cables.

• Store these instructions in a safe place.

After reading, store this instructions along with the warranty card in a safe place.

• Power is supplied to some of the circuitry even when the power is set to the standby mode using the power operation switch. When traveling or leaving home for long periods of time, be sure to unplug the power supply cord from the power outlet.

• Note that the illustrations in these instructions may differ from the actual unit for explanation purposes.

NOTE:

- This CD player uses a semiconductor laser. To ensure stable operation, it is recommended to use the set indoors at a temperature of 5°C (41°F) ~ 35°C (95°F).

Getting Started

Getting Started

Cautions on loading discs

- Only load one disc at a time. Loading two or more discs can damage the set or scratch the discs.
- Do not use cracked or warped discs or discs that have been repaired with adhesive, etc.
- Do not use discs on which the sticky part of cellophane tape or labels is exposed or on which there are traces of where labels have been removed. Such discs could get caught inside the player and damage it.

Cautions on handling

- Do not get fingerprints, oil or dirt on discs.
- Take special care not to scratch discs when removing them from their cases.
- Do not bend or heat discs.
- Do not enlarge the hole at the center.
- Do not write on the labeled (printed) surface with ball-point pens, pencils, etc., or stick new labels on discs.
- Water droplets may form on discs if they are moved suddenly from a cold place (outdoors for example) to a warm place, but do not try to dry them off using a hairdryer, etc.

Cautions on storing discs

- Be sure to remove discs after using them.
- Be sure to store discs in their cases to protect them from dust, scratches, warping, etc.
- Do not store discs in the following places:
 1. Places exposed to direct sunlight for long periods of time
 2. Dusty or humid places
 3. Places exposed to heat from heating appliances, etc.

Cleaning discs

- If there are fingerprints or dirt on discs, wipe them off before using the disc. If not the sound quality could be reduced and the sound may be broken.
- Use a commercially available disc cleaning set or a soft cloth to clean discs.

Gently wipe the disc from the inside towards the outside.

Do not wipe with a circular motion.

NOTE:

- Do not use record spray, antistatic agents, or benzene, thinner or other solvents.

Playing MP3 or WMA (Windows Media® Audio) files

Before playing MP3 or WMA files

There are many music distribution sites on the Internet allowing you to download music files in MP3 or WMA format. The music (files) downloaded from such sites can be stored on CD-R or CD-RW discs and played on the DCD-F102.

“Windows Media” and “Windows” are registered trademarks or trademarks in the United States and other countries of the Microsoft Corporation of the United States.

※ According to copyright laws, recordings you have made should only be used for your personal enjoyment and must not be used in other ways without the consent of the copyright holder.

☐ Order in which the folders are played

If there are multiple folders containing MP3 or WMA files, the DCD-F102 automatically assigns the folders numbers when reading the disc. The folders switch according to the numbers they have been assigned. If there are no playable files in a folder, that folder is ignored.

☐ Order in which files are played

The order in which the files are played depends on the folder structure attributed when the disc was created and other data recorded on the disc when the files were recorded. With the folder structure shown in the following example, the files are played in numerical order (1, 2, 3 ...).

※ The data stored on the disc depends on the writing software. Because of this, the files may not play in the desired order.

☐ Setting the folders and files to be played (folder mode/file mode)

Use **[FOLDER MODE]** to switch between the modes.

• Folder mode

The “FLD” indicator lights.

Only the selected folder is played.

Example: When folder ④ is selected

Files 4, 5 and 6 are played.

Folder ⑤ is treated as a separate folder, so files 7 and 8 are not played.

• Disc mode (folder mode: OFF)

The “FLD” indicator turns off.

All the files in all the folders from the selected folder or file on are played.

Example: When file 3 in folder ③ is selected

All the files from file 3 on are played.

Operation

When the DCD-F102 and receiver (DRA-F102/F102DAB) are connected using system connections, the DCD-F102 can be operated using the system remote control (RC-1034) unit included with the receiver.

NOTE:

- The DCD-F102 is compatible with “MPEG-1 Audio Layer-3” standards (sampling frequency of 44.1 and 48 kHz). It is not compatible with “MPEG-2 Audio Layer-3”, “MPEG-2.5 Audio Layer-3”, MP1 or MP2 standards.
- Programmed playback is not possible with discs containing files recorded in MP3 or WMA format.
- The signals are output with a sampling frequency of 44.1 kHz.
- When writing MP3 files on a CD-R or CD-RW disc, set the writing software’s format to “ISO9660 Level 1”. The files may not play properly if they are recorded in other formats. Also note that with some writing software it is not possible to record in ISO9660 format. If so, use a different program allowing you to record in ISO9660 format.
- With MP3 files, the higher the bit rate, the better the sound quality. The compatible bit rate range is 32 to 320 kbps for MP3 files, 64 to 160 kbps for WMA files. We recommend using MP3 files with bit rates of 128 kbps or greater on the DCD-F102.
- Be sure to add the extensions “.MP3” or “.WMA” to MP3 or WMA files, respectively. Files with extensions other than “.MP3” or “.WMA” or files without extensions cannot be played. (On Macintosh computers, MP3 files can be played by giving the extension “.MP3” after the file name consisting up a maximum of 8 alphanumeric characters and storing the files on a CD-R or CD-RW disc.)
- The DCD-F102 is not compatible with packet write software or playlists.
- Up to 32 characters of folder and file names can be displayed.
- The DCD-F102 is compatible with MP3 ID3-Tag versions 1.x and 2.x.
- The time may not be displayed properly when searching or pausing during variable bit rate playback.
- The time display cannot be switched using [TIME/DISPLAY].
- For files in which the title name and artist name data are stored, the title name or artist name can be displayed in the play or pause mode by pressing [TIME/DISPLAY].
- Multisession and CD-R/CD-RW discs that have not been completely written can be played, but we recommend using discs closed after a maximum of 10 sessions or discs that have been completed.
- The DCD-F102 is compatible with the titles, artists and albums of WMA file meta tags.
- The maximum number of files and folders playable is 512 (total of the number of folders and files). The maximum number of folders is 256.
- Copyright-protected WMA files cannot be played. (“Not Support” is displayed. Use <◀◀/◀◀> or <▶▶/▶▶> ([◀◀]) or [▶▶]) to select a different file.)

System Operations
